

ISAIAH ARIS ALVAREZ

SOFTWARE DEVELOPER | FULL-STACK ENGINEER

Oxnard, CA | 805-827-1393 | isaiah.aris@gmail.com | LinkedIn | github.com/isaiaha09

PROFESSIONAL SUMMARY

Full-stack software developer with hands-on experience designing, building, testing, securing, and deploying production-oriented web and mobile applications. Experienced with **Python, Django, REST APIs, JavaScript, TypeScript, React, Next.js, React Native, PostgreSQL, and cloud deployment**. Built business systems supporting **lead and customer management, role-based portals, scheduling, payments, documents, communications, analytics, and administrative workflows**. Experienced translating business requirements into maintainable software solutions from database design through deployment and operational support.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, HTML, CSS
Frameworks	Django, Django REST Framework, Next.js, React, React Native, Expo, Tailwind CSS
Databases	PostgreSQL, SQLite, Redis, Django ORM, relational data modeling
Cloud & Deployment	Render, Vercel, Supabase, Cloudinary, Gunicorn, WhiteNoise
APIs & Integrations	REST APIs, Stripe, Stripe Connect, webhooks, Cloudflare, Brevo SMTP, Sentry
Testing & DevOps	Pytest, Django TestCase, Jest, Playwright, Git, GitHub, GitHub Actions, CI/CD
Application Security	Authentication, authorization, RBAC, TOTP/2FA, CSRF, rate limiting, secure file access, signed links, audit logging

PROFESSIONAL EXPERIENCE

Freelance Software Developer

Jan 2025 – Present

Independent Practice

Oxnard, CA

- Design, develop, maintain, test, and deploy full-stack web and mobile applications for client businesses, translating operational requirements into scalable technical solutions.
- Build business applications supporting **leads, customers, employees, scheduling, payments, communications, documents, analytics, and role-specific access** to operational data.
- Develop backend architecture using **Python, Django, Django REST Framework, PostgreSQL, REST APIs, and Django ORM**, including data models, migrations, authentication, authorization, integrations, and administrative workflows.
- Develop responsive interfaces and mobile experiences using **JavaScript, TypeScript, React, Next.js, React Native, Expo, HTML, CSS, and Tailwind CSS**.
- Integrate third-party services including **Stripe, Cloudflare, transactional email, push notifications, cloud storage, custom domains, and external APIs**.
- Test and troubleshoot applications using automated test suites, deployment checks, Git-based version control, and production monitoring.
- Implement security controls including role-based access, multi-factor authentication, throttling, CSRF protection, secure uploads, signed access, and audit-oriented logging.

Owner & Baseball Instructor

Apr 2025 – Present

Coach Alvarez

Oxnard, CA

- Operate a client-facing coaching business averaging approximately **30 lessons per month**, managing scheduling, customer communication, booking policies, and recurring service delivery.
- Apply self-developed website and CircleCal technology to automate appointment booking, confirmations, cancellations, rescheduling, and customer notifications.

EDUCATION

Bachelor of Science in Advanced Computer Science

2024

Avila University

Kansas City, Missouri

GPA: 3.75 / 4.00 | Magna Cum Laude

SELECTED SOFTWARE ENGINEERING PROJECTS

Grand Coast Construction | Construction Operations Platform Python | Django | PostgreSQL | JavaScript | React Native

- Built a role-aware business operations platform spanning **lead intake, estimates, clients, projects, assignments, milestones, tasks, schedules, time entries, documents, media, messages, notifications, and activity history**.
- Implemented operational workflows for preconstruction, permits, inspections, agreements, payment schedules, budgets, costs, change orders, daily reports, material requests, closeout, and warranty work.
- Designed role- and object-level authorization for **Owner, Manager, Office, Sales, Field, Client, and Subcontractor** users, including restricted financial information and client-specific document access.
- Built secure file handling, administrative security controls, audit events, authentication safeguards, and automated Django test suites covering application workflows and platform behavior.

CircleCal | Booking & Scheduling SaaS

Django REST | PostgreSQL | React Native | Expo | TypeScript

- Developed organization-scoped scheduling for services, staff, availability, overrides, busy blocks, buffers, resource capacity, group bookings, cancellations, rescheduling, and audit history.
- Built account, organization, membership, role, team, subscription, payment method, invoice, device, and action-log domains with cross-organization protections.
- Integrated **Stripe Checkout and Connect**, subscription billing, payment methods, invoices, coupons, webhook signature verification, transactional email, push notifications, and calendar links.
- Implemented TOTP authentication, login protection, API throttling, CSRF protection, signed booking links, protected uploads, custom domains, and production deployment workflows.

Miranda Insights & SurveyHQ | Analytics Platform

Python | Django | PostgreSQL | Tailwind | Chart.js

- Built survey creation, administration, and lifecycle workflows supporting multiple question types, access codes, scheduled availability, publication controls, retention rules, and audit history.
- Developed participant access controls using QR/code entry, temporary permissions, code rotation, deadlines, rate limiting, duplicate-submission prevention, and granular application permissions.
- Produced live dashboards and exportable analytics including frequencies, percentages, distributions, numeric summaries, Likert analysis, ranking analysis, CSV exports, and generated PDF reports.
- Implemented queued communications, transactional email, cloud storage, production workers, monitoring, and deployment infrastructure.

DiningDealz / HappyHourApp | Local Discovery Platform

Django REST | Next.js | React Native | PostgreSQL |

Redis

- Built a mobile-first platform for discovering restaurants, businesses, attractions, happy hours, and daily specials through map/list views, search, filters, profiles, favorites, messaging, and location-based features.
- Developed customer and business authentication, email verification, password recovery, business membership and claims, portal-aware authorization, and TOTP-based two-factor authentication.
- Created source-backed data workflows for normalization, deduplication, multi-location grouping, address merging, coordinate backfill, and administrative data management.

ADDITIONAL EXPERIENCE

Personal Baseball Instructor

Jun 2023 – Feb 2025

S.I.S. Athletics

Ventura, CA

- Delivered individual and group instruction, organized clinics and camps, maintained recurring customer communication, and worked with baseball training and simulator technology.

Professional Baseball Player

May 2025 – Jul 2025

Pecos League Pacific Division

Monterey, CA

- Competed professionally in the Pecos League Pacific Division, demonstrating adaptability, performance under pressure, teamwork, discipline, and accountability in a competitive environment.
